Giles County
Broadband Internet Provider
Comparison Study

The Comparison Study was conducted by an independent Internet Solutions Provider, Rackley Technologies, LLC of Pulaski, Tennessee. Rackley Technologies, LLC provides Internet Solutions such as Web Site Design, Web Applications, Web-Based Security Camera Solutions, Online Backup Services, Local Area Networking and PC Support in Giles County, Middle Tennessee and North Alabama. Rackley Technologies, LLC has no business relationship, partnership or any other type relationship with any Internet Service Provider listed in this study.

PURPOSE OF THE COMPARISON STUDY

The purpose of the broadband Internet comparison study was to provide residents of Giles County a resource to compare Internet Services available to them. Rackley Technologies, LLC is contacted frequently and asked "what Internet service do I need" and "what is available to us".

Rackley Technologies, LLC works with many different Internet providers to provide its customers with the best service that is available to them at the best price. Not all Internet Providers have service to all areas of the county. As a matter of fact, very few provide 100% coverage to all areas of the Giles County. This study will provide residents of Giles County a compiled listing of all Broadband Internet Providers and show the results of a "speedtest" using existing customer accounts.

TESTING PROCESS

All the known Broadband Internet Providers servicing Giles County were contacted and explained the Comparison Study. Each Provider was asked to supply Rackley Technologies, LLC with a list of a few "select" customers for Rackley to perform the speedtest. Some providers were reluctant to provide a user of their service. Rackley Technologies, LLC customer base consisted of a large number of these users and permission was granted from the end user to perform the speedtest. Several Internet based speedtests were selected and tested at Rackley Technologies, LLC. It was decided to use one speedtest on all accounts for consistency.

The speedtest provided at http://www.speakeasy.com/speedtest was selected. This and several other tests can be found on our website, http://www.rackleytechnologies.com under Products and Services, Web Applications. The Atlanta Speakeasy server was chosen on all test locations for consistency. The speedtest results were printed and provided in this Comparison Study. Several locations may have been tested for each provider. The service level of the customer was determined either from the customers invoice or directly from the ISP. Rackley Technologies, LLC visited each providers website or was provided a breakdown of all service levels offered by the ISP. The service levels or a website link for each provider is provided in this study. The summary and graph portion of the study only exhibits the "best" results for each provider. All tests results are provided in the study.

MediaCom Cable - Advertises locally but will not respond to email nor able to contact via phone					

COVERAGE AREAS

Ardmore Telephone Company

Would not respond to email requests. Provides service in Ardmore and Southern portion of Giles County. Http://www.ardmore.net

Bellsouth

No coverage area provided. Visit http://www.fastaccess.com, click on Home, or Business service and enter your telephone number and it will advise you if service is available.

Charter

No coverage area provided.
Visit http://www.charter.com/Visitors/Products.aspx?MenuItem=3
to see if service is available at your location

Cingular

No coverage area provided.
Visit http://www.cingular.com/cell-phone-service/get-started/index.jsp

iGiles.net Wireless

See Attached Coverage area map provided.
Also visit http://www.igiles.net/prod01.htm

HughesNet

Coverage area is "basically anywhere that has a clear view of the southern sky"
HughesNet uses the satelite system formerly Direcway.
Visit http://www.hughesnet.com

MediaCom Cable

MediaCom Cables advertises locally but will not reply to e-mails nor answer telephone calls when attempted by Rackley Technologies, LLC.
Visit Http://www.mediacomcable.com/home.html

PES/Energize

See attached coverage area map. Primarily within the city limits of Pulaski, but does extend outside in some areas.
Visit: http://www.energize.net/files/EnergizeServiceArea.pdf

Surfmore.net

DSL services are available whereever Bellsouth provides a DSL circuit. Contact Surfmore to determine availability. 931-363-7700
Wireless - Limited to approximately 10 miles from their wireless towers.
See attached map of tower locations. Visit http://www.surfmore.net

Coverage Areas (Cont.)

TNETS - Lewisburg

Wireless has limited availability in Northeast portion of Giles County. Contact TNETS to determine availability. 931-359-8254 or visit http://www.tnets.net

Verizon Wireless Broadband

VZAccess service is available anywhere in Giles County that has normal cell phone coverage. Visit http://www.verizonwireless.com

[redacted] Test

Your Connection Speed

Take the Speakeasy Speed Test and test your connection speed! By measuring the download and upload rate from the following locations you are able to accurately judge your current line throughput or internet connection speed. To take the speed test, choose the server nearest you.

The Speakeasy Speed Test requires the latest version of Macromedia Flash Player installed to use with your preferred browser.
Also, temporarily disable any Adblock extensions on your browser.

Verizon Wireless

Last Result:
Download Speed: **67** kbps (8.4 KB/sec transfer rate)
Upload Speed: **1107** kbps (138.4 KB/sec transfer rate)

Please note the 67 k download and the 1107 upload. Rackley Technologies called Verizon Wireless to inquire about these rates. Their Support advised us that they only guarantee 14.4k download and upload. Numerous test were performed and all results were similar.
